The Parlor Idea Is Almost Obsolete

The old-fashioned Parlor with its stuffy upholstered furniture and closely drawn shades is rapidly giving way to the modern Living Room.

Lighter, brighter and more comfortable furniture is replacing the old type with its bristling haircloth, stiff springs and accommodating dust receptacles.

Modern artists have caught the better features of the old period styles and reproduced them with modern improvements.

Comfort, Beauty and Durability are the important considerations," and almost without realizing it we are beginning to recognize the hygienic value of proper-. Iv constructed and arranged furniture and home furnishings.

The Living Room is now a place where Dad can smoke, Mother can mend, Sister may entertain. Even the Kid Brother is permitted to roam at will,

There's plenty of light and fresh air, and there's furniture to fill the particular requirements of your particular room.

We have recently received a number of New Living Room Suites, and a visit to our show rooms will convince you of their superior style and quality.
